Cockle Bay Wharf,
Darling Harbour.

ASIS NSW would like to sincerely thank its valued supporters for their continued assistance in support of industry development.

Proudly Supported by

Presenter and Session Overview.

Four individual sessions followed by a panel session with all our presenters.

Arthur Katsogiannis.
*Commander, Fraud
and Cybercrime Squad
NSW Police.*

Commander Katsogiannis will be focusing his session on key trends in cybercrime over the preceding twelve months and discussing its impact on the general business community.

Mr Wayne Ronaldson.
*Principal
Consultant,
Risk
Offensive.*

Wayne Ronaldson's session is on "Red Teaming Cyber Security" and will provide real life scenarios of how adversaries have carried out attacks on companies and will suggest strategies that can be deployed to manage the cyber threat

Dr. Keith Suter.
*Renowned futurist,
thought leader and
international Foreign
Affairs Editor.*

Dr. Suter's has been presenting at the ASIS Conference now for three years running and his presentations have always been incredibly well received. His session is "How has Information Technology become the latest security threat"

Chairman's Message:

We have a unique lineup of thought provoking presenters of the highest caliber, who will be discussing aspects pertaining to this rapidly evolving and dynamic area of our industry that is important to us all as security professionals, as responsible community members and also as concerned parents or guardians.

Is our digital privacy slowly evaporating? Is business evolving rapidly enough to deal with threats on this modern front?
If social media security, cyber security and safety as well as ransomware and cyber terrorism concerns aren't on your radar, they should be.
I look forward to seeing you there and learning alongside you.
Scott Taylor, CPP
Chapter Chairman – ASIS NSW.
